

Usman Hassan

Software Engineer | Frontend Focus

me@usmangurowa.dev | +234 813 922 3164 | Abuja, Nigeria

usmangurowa.dev | GitHub | LinkedIn

Summary

Software engineer building web and desktop interfaces. Currently at Levenza, connecting desktop chat and settings experiences to backend APIs and agent workflows. Led frontend delivery at Brimble and built wallet, shopping and community applications with React, Next.js and TypeScript, with additional Vue.js and Nuxt.js experience.

Skills

Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, Next.js, Vue.js, Nuxt.js, React Native

UI and state: Tailwind CSS, shadcn/ui, Radix UI, TanStack Query, TanStack Table, Zustand, Zod, Motion

Delivery and testing: Git, GitHub, Vercel, Playwright, Vitest

Experience

Software Engineer — Levenza | Mar 2025 – Present

- Built interactive desktop chat and conversation-management features, connecting interfaces to backend APIs and agent workflows.
- Implemented device-session management across settings interfaces and backend APIs, including individual and bulk device sign-out.

Software engineering lead — GenzTechies | Aug 2022 – Present

- Build and maintain the community's web applications, implement features and resolve bugs.
- Mentor developers and help organize community hackathons.

Software engineer — Brimble | Aug 2022 – Early 2025

- Led front-end development for a web hosting platform, building its interface with Next.js and TypeScript.
- Implemented authentication and validation flows, and integrations with GitHub, Google and Firebase.

Software engineer — Yusra | Mar 2024 – Dec 2024

- Built the web application with Next.js and TypeScript alongside the mobile product.
- Built and shipped mobile and web applications for a brand-wallet shopping and rewards product.

Hardware engineering intern — Terrahaptix | Sep 2024 – Dec 2024

Full-stack developer — Chimoney | Mar 2024 – Jun 2024

- Built payments, wallets and payouts features across mobile and web applications.

Mobile developer — Goalr | Jul 2023 – Mar 2024

- Designed, built and released the React Native and Expo app as the sole mobile developer, shipping to iOS and Android.

Backend Engineer — Aviato | 2023 – 2024

Mobile developer — Scrim | 2022 – 2023

- Built the rewards and payments app from the ground up with React Native, Expo and TypeScript; released it on iOS and Android.
- Contributed to the web application and API integrations for payments, crypto swaps and global transfers.

Mobile app developer — EarlyBean | Aug 2022 – Mar 2023

- Built the mobile interface and business logic as the sole mobile developer for a family finance and learning app.

Front-end engineer — Cykmore | Aug 2022 – Jan 2023

- Built front-end features with Vue.js and Nuxt.js, collaborating with other developers on recruitment software.

Software engineer intern — BuildBrothers | 2021 – 2022

- Built web applications at the BuildSpace hub, including WhoDeySell, a local marketplace with price discovery and item swapping.

Selected projects

Penter | 2023 - 2024 | penter.xyz

A design tool that turns CSV or JSON data into dynamic designs using text, images and colours.

Stack: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS

Kodo | 2025 - 2026 | kodo.codes

A developer productivity and session tracking platform spanning mobile, web and IDE extensions.

Stack: TypeScript, React Native, Expo, Next.js

WhoDeySell | 2021 - 2022 | whodeysell.com.ng

A local marketplace with price discovery and a Swap-It feature for trading items. Built while at BuildBrothers.

Stack: React, Next.js, JavaScript

Education

B.Sc. Computer Science | 2022 – 2025

Taraba State University

Diploma in Computer Science | 2018 – 2021

NACEST — Nigerian Army College of Environmental Science and Technology.

Recognition

1st place, GenzTechies Hackfest (Jul 2022), with SafePal, a missing-person reporting app.
