

Usman Hassan

Software Engineer | Mobile Development

me@usmangurowa.dev | +234 813 922 3164 | Abuja, Nigeria

usmangurowa.dev | GitHub | LinkedIn

Summary

Mobile software engineer building React Native and Expo applications with TypeScript. Sole mobile developer for Scrim, Goalr and EarlyBean, with iOS and Android releases at Scrim and Goalr. Experience includes payments, wallets, biometric authentication, secure storage, notifications and health-platform integrations.

Skills

Core: TypeScript, JavaScript, React Native, Expo

App development: EAS, React Navigation, Reanimated, Skia, Zustand, TanStack Query

Device and delivery: Biometric authentication, Secure storage, Push notifications, OTA updates, App Store, Google Play

Services and testing: Firebase, Supabase, Better Auth, Node.js, Vitest

Experience

Software Engineer — Levenza | Mar 2025 – Present

- Built interactive desktop chat and conversation-management features, connecting interfaces to backend APIs and agent workflows.

Software engineering lead — GenzTechies | Aug 2022 – Present

- Mentor developers and help organize community hackathons.

Software engineer — Brimble | Aug 2022 – Early 2025

- Implemented authentication and validation flows, and integrations with GitHub, Google and Firebase.

Software engineer — Yusra | Mar 2024 – Dec 2024

- Developed the mobile application with React Native and Expo for store discovery, brand wallets, rewards and shopping.
- Built and shipped mobile and web applications for a brand-wallet shopping and rewards product.

Hardware engineering intern — Terrahaptix | Sep 2024 – Dec 2024

Full-stack developer — Chimoney | Mar 2024 – Jun 2024

- Built payments, wallets and payouts features across mobile and web applications.

Mobile developer — Goalr | Jul 2023 – Mar 2024

- Designed, built and released the React Native and Expo app as the sole mobile developer, shipping to iOS and Android.
- Integrated Apple Health, Strava, Garmin and Google Fit to track walks, runs and rides.

Backend Engineer — Aviato | 2023 – 2024

Mobile developer — Scrim | 2022 – 2023

- Built the rewards and payments app from the ground up with React Native, Expo and TypeScript; released it on iOS and Android.
- Implemented wallets, biometric authentication, secure storage, push notifications and over-the-air updates.
- Contributed to the web application and API integrations for payments, crypto swaps and global transfers.

Mobile app developer — EarlyBean | Aug 2022 – Mar 2023

- Built the mobile interface and business logic as the sole mobile developer for a family finance and learning app.

Front-end engineer — Cykmore | Aug 2022 – Jan 2023

- Built front-end features with Vue.js and Nuxt.js, collaborating with other developers on recruitment software.

Software engineer intern — BuildBrothers | 2021 – 2022

- Built web applications at the BuildSpace hub, including WhoDeySell, a local marketplace with price discovery and item swapping.

Selected projects

Silo | 2025 - 2026 | silo.ng

A mobile-first personal finance app with transaction intelligence, fund locking, group savings and bill splitting.

Stack: React Native, Expo, TypeScript, Zustand, Tailwind CSS

Kodo | 2025 - 2026 | kodo.codes

A developer productivity and session tracking platform spanning mobile, web and IDE extensions.

Stack: TypeScript, React Native, Expo, Next.js

Education

B.Sc. Computer Science | 2022 – 2025

Taraba State University

Diploma in Computer Science | 2018 – 2021

NACEST — Nigerian Army College of Environmental Science and Technology.

Recognition

1st place, GenzTechies Hackfest (Jul 2022), with SafePal, a missing-person reporting app.
